

Modern Skies Coalition Applauds Senate Commerce Chairman Cruz’s Investment in Air Traffic Control Modernization

WASHINGTON, June 6, 2025 – Today, a broad coalition of aviation stakeholders released the statement below supporting the Senate Commerce Committee’s initiative to modernize the nation’s air traffic control system.

"As stakeholders from across the aviation industry, the Modern Skies Coalition is united in sounding the alarm about the challenges created by aging technology and infrastructure, as well as the controller and technician staffing shortages. We appreciate the hard work of Chairman Cruz and the Senate Committee on Commerce, Science & Technology to address these decades-old issues by building on their work in the 2024 FAA Reauthorization law. The Committee’s approach is a necessary down payment on achieving these benefits for the Americans who fly and ship goods every day. We look forward to working with policymakers to build on this legislation based on a more comprehensive proposal from the Administration to increase investments in these key areas and implement procurement reform for the FAA that ensures system performance and accountability.

"We look forward to working with the Senate, House, Administration and all policymakers to ensure this initial investment as well as other critical modernization and staffing initiatives are addressed and sent to the President for his signature."
